

1. Sakthi Max (Double Power)

NPK Combo for Soil Application

- Microbial Count: 3×10^{11} C.F.U per ml.
 - Microbes: * Nitrogen Fixing Bacteria (*Azospirillum*)
 - Phosphorus Solubilising Bacteria (*Bacillus sp.*)
 - Potash Mobilising Bacteria (*Bacillus sp.*)
 - Advantages: Improves plant vegetative growth, strengthens immunity, and reduces environmental stress.
 - Benefits: Eco-friendly, easy to use, and reduces the need for chemical fertilizers.
 - Dosage: 1 packet (100 ml) per acre.
 - Mode & Form of Application: * Seed Coating: Direct application to seeds.
 - Soil Application: Drip irrigation or soil drenching (mixed with sand or compost).
-

2. Surya Max (Double Power)

NPK Combo for Flowering and Fruiting

- Microbial Count: 3×10^{11} C.F.U per ml.
 - Microbes: * Nitrogen Fixing Bacteria (*Azospirillum*)
 - Phosphorus Solubilising Bacteria (*Bacillus sp.*)
 - Potash Mobilising Bacteria (*Bacillus sp.*)
 - Advantages: Controls flower and fruit drop, improves fruit/flower size and quality, and increases yield by up to 25%.
 - Benefits: Eco-friendly, easy to use, and reduces chemical fertilizer dependency.
 - Dosage: 1 packet (100 ml) per acre.
 - Mode & Form of Application: * Soil Application: Drip irrigation, soil drenching (mixed with sand or compost), and water drenching.
-

3. Nutrigel Plus (Plant-G)

Balanced Plant Nutrition (Foliar Spray)

- Microbial Count: Not specified (Focuses on nutrients and organic matter).
 - Composition: All essential amino acids, Nano-Micronutrients, Organic Carbon, and Nitrogen.
 - Advantages: Improves fruiting, flowering, fruit size, color, and quality.
 - Benefits: Uniform disbursal, easy absorption, and easy to apply.
 - Dosage: 1 packet (100 ml) per acre.
 - Mode & Form of Application: * Foliar Spray: Dissolve 100 ml in 100 to 200 liters of water (depending on crop foliage) and mix thoroughly before spraying.
-

4. Super-Tri (More Power)

Natural Fungicide

- Microbial Count: $>10^{10}$ cells/ml.
- Microbes: *Trichoderma viridae*.
- Advantages: Fights against bacterial, fungal, and viral infestations; improves nutrient absorption and plant immunity.
- Benefits: Potent formula that reduces the usage of chemical fungicides; easy application.
- Dosage: 1 packet (100 ml) per acre.
- Mode & Form of Application: * Seed Coating & Soil Application: Can be applied directly to seeds or soil.
 - Drip Irrigation: Mix 100 ml into 5 liters of water, then dilute further to 200 liters for drip application.

5. Super-Soil (More Power)

Disease Prevention

- Microbial Count: $>10^{10}$ cells/ml.
- Microbes: *Pseudomonas sp.*
- Advantages: Prevents soil-borne diseases by surpassing pathogens; improves nutrient absorption and plant immunity.
- Benefits: Potent formula that reduces fungicide usage; easy application.
- Dosage: 1 packet (100 ml) per acre.
- Mode & Form of Application: * Seed Coating & Soil Application: Direct seed or soil use.
 - Drip Irrigation: Mix 100 ml into 5 liters of water, then dilute to 200 liters for drip application.
